U.S. / Canada Great Lakes Public Forum
June 17-19, 2019

EPA United States
Environmental Protection
Agency

Overview

The United States and Canada invite members of the public, organizations, and agencies with an interest in Great Lakes issues, or those involved Great Lakes programs, to attend the June 17 to 19, 2019 Great Lakes Public Forum. Governments would like to hear from you on Great Lakes matters!

The Great Lakes Water Quality Agreement calls for the United States and Canada to convene the Great Lakes Public Forum once every three years to discuss the state of the lakes, progress made under the Agreement, and proposed priorities to guide science and actions over the next three years. The meeting also provides an opportunity for the public to provide input to the International Joint Commission, who are tasked with advising the United States and Canada with respect to the implementation of the Agreement.

Three-day Agenda Summary

Morning of Day 1 – Summary of the State of the Great Lakes

Afternoon of Day 1, Day 2, and Morning of Day 3 – Sessions summarizing progress on major Great Lakes environmental issues, organized by the ten Annexes of the Great Lakes Water Quality Agreement

Lead U.S. and Canadian agencies will facilitate each topic session, consisting of:

- A description of related environmental indicators;
- A description of how governmental organizations work together to implement related environmental restoration and protection actions;
- Implementation success stories from Federal, State, Provincial, Tribal, First Nation, Métis, and community speakers; and
- The proposed priorities to guide science and actions for the next three years.

Afternoon of Day 3 – [The International Joint Commission's Public Roundtable](#)

Tentative Agenda:

June 17th, 2019

8:00 AM – 9:00 AM Registration

Welcome

Summary of the State of Great Lakes

Presented by U.S. Environmental Protection Agency and Environment and Climate Change Canada

Break and Networking
