Proudly Present:

Chemical Agents of Opportunity for Terrorism: The Medical Consequences of TICs (Toxic Industrial Chemicals) and TIMs (Toxic Industrial Materials)

Thursday, December 18th 2007

8:00 – 8:30 am sign-in

8:30 – 4:30 pm course

Dellums Federal Building
1301 Clay Street
Oakland, California, 94612

Most first responders have been trained to recognize and respond to attacks involving traditional “warfare” chemicals, but these are often not the most likely agents that could be used by terrorists. Common and unusual industrial chemicals may pose just as much of a threat. An appreciation of the many toxic chemicals available in our communities is crucial to prepare, identify and defend against chemical threats. This course provides awareness-level training for a variety of toxic syndromes likely to be encountered following exposures to “chemical agents of opportunity.”

The faculty members are all board certified and fellowship trained physician medical toxicologists who are members of the American College of Medical Toxicology (ACMT) and currently serve as consultants to ATSDR. They have extensive experience directly caring for patients suffering from the ill-effects of chemical agents and poisons.

Registration is free and must be completed by December 7, 2007 at <http://www.trainex.org/>. Public transportation, driving directions and hotel information can be found on the web-site.

For additional information or questions, please contact Libby Vianu, ATSDR Regional Representative, at (415) 947-4319 or vianu.libby@epa.gov.
