EPA Region 4 Invites Environmental Professionals to a Hands-on RCRA Organic Air Emissions Standards Inspector & Permit Writer Training Workshop

RCRA Organic Air Emissions Standards, Subparts AA, BB and CC of 40 CFR Parts 264 and 265 are applicable to permitted and interim status TSDFs, LQGs, and to recycling units at TSDFs. The requirements of these standards are very detailed and specific to the type of equipment, emissions control device/equipment, and hazardous waste management unit. The inspections and permitting at facilities subject to these standards can be labor intensive and complex.

- The goals of this workshop are to introduce new training and reference tools which:
- 1) Identify the exact informational content required for a complete permit application and to prepare an effective and enforceable permit;
- 2) Identify the key inspection points and compliance-demonstrating records; and
- 3) Train regulators on how to use these tools to effectively implement and administer the RCRA Organic Air Emissions Standards.

Region 4 invites all State and EPA Environmental Regulatory Professionals to attend.

This two day workshop includes a half day field exercise. The workshop will be held on September 10 - 11, 2008 (8:00 to 4:00), at the Sam Nunn Atlanta Federal Center, 3rd Floor, EPA Conference Center, Augusta Room, 61 Forsyth St., SW, in Atlanta, Georgia.

No registration fee. Register at www.trainex.org

Registration will be limited to 50 people on a first come first serve basis. The field exercise is limited to two persons/state. Please notify Denise Housley (housley.denise@epa.gov) with your staff preferences for the field exercise.
