Thursday , August 27th 2009

California Emergency Management Agency

3650 Schriever Ave. Mather

Rancho Cordova, CA 95655

9:00 AM – 4:30 PM

**** Registration is free and must be completed by August 20th, 2009 ****

<http://www.trainex.org>

The continued availability of reagents and the hazardous wastes created in the manufacture of methamphetamine raises concerns about exposure to responders and cleanup/re-occupancy procedures. Acute and chronic health effects of methamphetamine and its illicit manufacture from medical, social, and legal perspectives will be covered. This course will also address the special considerations for the exposure of children to methamphetamine and some of the chemical hazards associated with the labs.

For additional information or questions, please contact Libby Vianu at ATSDR: (415) 947-4319 or vianu.libby@epa.gov.
