

RCRA Facilities Investigation Remedy Selection Track Toolbox Training

United States
Environmental Protection
Agency

EPA Region 9, in partnership with EPA's Region 3 and the Los Angeles Regional Water Quality Control Board (LA Board), are holding an April 30- May 1, 2019 training on opportunities to improve corrective action at refineries and other cleanup projects using the RCRA Facilities Investigation Remedy Selection Track (FIRST) tools. EPA Regional staff, LA Board staff and refinery project managers and consultants are invited.

Why Attend?

RCRA FIRST provides tools to manage corrective action projects with an objectives-based approach. The RCRA FIRST tools were developed as outputs from two Lean events. The RCRA FIRST approach:

- ❑ Reduces time and costs needed to complete the facility investigation and remedy selection
- ❑ Accelerates positive environmental results for affected communities
- ❑ Provides a roadmap with process metrics to drive continuous improvements
- ❑ Enhances communication throughout the process
- ❑ Ensures all stakeholders have a clear understanding of the steps to select a remedy and complete construction

The training will provide an overview of the **RCRA FIRST Toolbox**, ([Download Here](#)) which contains the following resources:

- How-to guidance
- Case studies from pilot projects
- Process flow maps
- Tools and templates

The Training will include a discussion of RCRA Corrective Action at Region 10 facilities, exercises, and a special focus on drafting remedial action objectives at refineries.

DATE: April 30 – May 1, 2019

TIME: 9:00 AM - 4:30 PM

LOCATION:

U.S. Environmental Protection Agency
Los Angeles Field Office
600 Wilshire Blvd, Suite 940
Los Angeles, CA 90017
